CORNER

### NOVEMBER CHANGES

*Time and changes* was the main topic of the month and it literally demonstrated its power. This November was not easy at all as the operation of school reflected the bleak pandemic situation in the country and affected lives of teachers and other employees on many levels. Even though our ranks have been weakened, we tried to provide as much care and education to children as we could and we are happy we did not have to close our doors as in many other institutions. Children with their open hearts, innocence and imagination kept us going in the hard times.

We would like to thank especially to Vladka, our school psychologist, who keeps an eye on the atmosphere in each class, prepares team building programs based on the needs of children, consults parents, children and teachers and brings huge support to the whole school. And a big thanks also goes to teachers who had to work more in order to cover for the absent colleagues.

We also want to mention another important thing - due to the ecological footprint and the costs we had to give up our good old BB bus and Milan decided for a change of career. For trips and excursions we are renting a big new bus with a driver and for shorter journeys we will support healthy walking. :-)

Dear parents, thank you for being understanding and enjoy a peek into November events!
